## PAPER ARTIST

Creative phone and tablet painting and photo app

Innovative top seller when launched and adopted as an in-phone pre installed app by Samsung

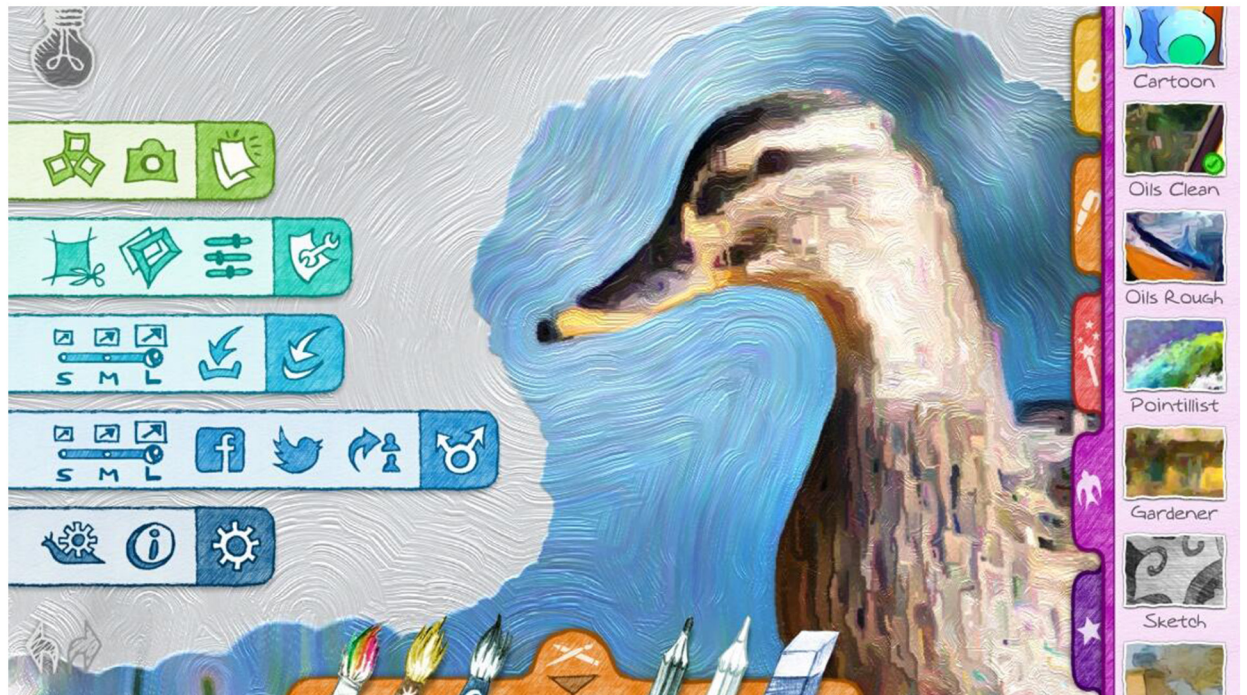

JFDP Labs liked my hand sketches of the redesign of their old UX and UI so much, that decided to directly use the scan of my hand drawn UI instead of cleaning and vectorizing them.

The apps became easier and more fun to use

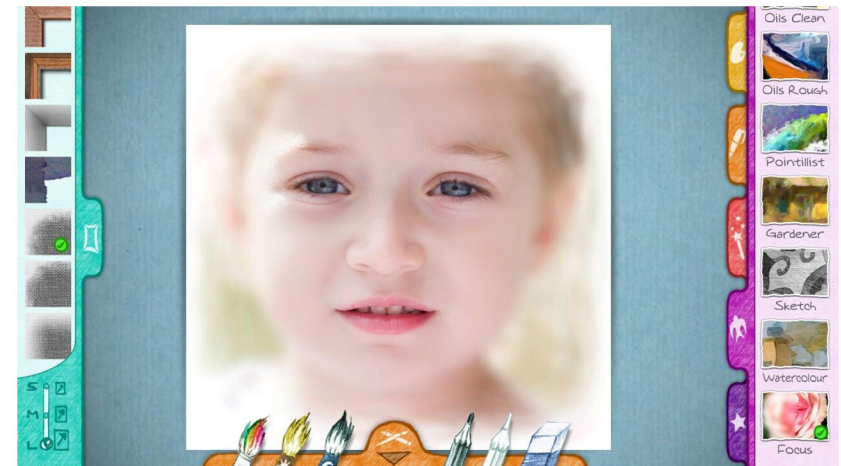

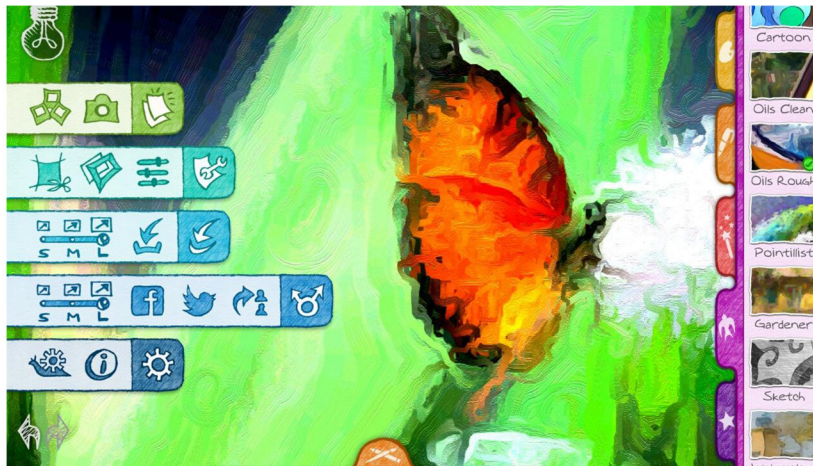

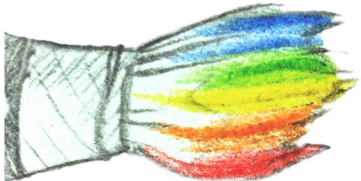

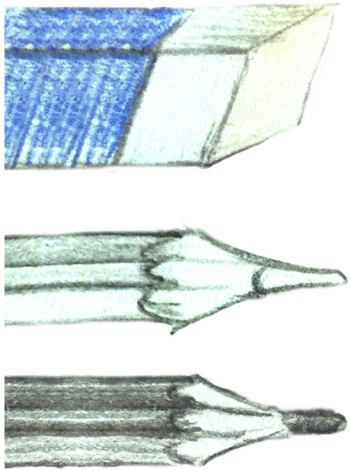

It is still on the market under the following link

## CAMERA 2

One of the first real-time effects apps

Since my complete rethinking and redesign of the UX and UI, it let you make better pictures and amazing videos in a very intuitive way

Featuring many unique high quality effects, grouped into families sharing a common theme

For them, I implemented a scrolling system which feels like a wheel under your thumb - here on the left side -

On the right side, you can see a peanut shape showing both the camera and photo buttons, also recognizable on my icon design above

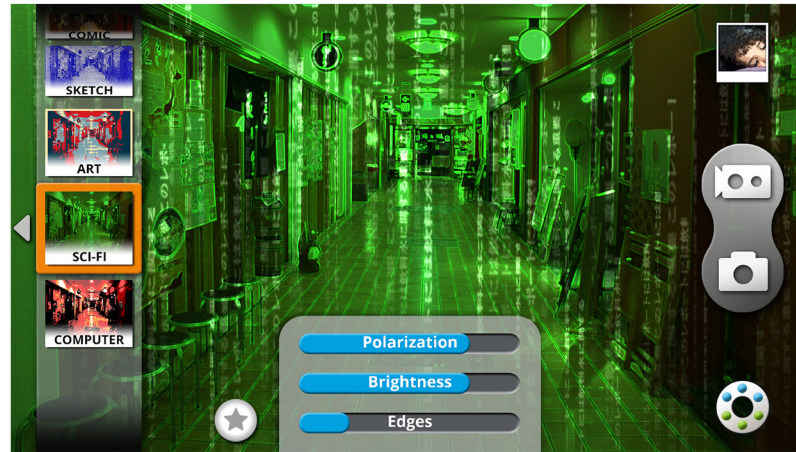

Bottom right you can see the menu in the form of a circle

When activated it brings up the top of a wheel where you can find the first set of function icons

Here you can see how my design also seamlessly adapts to the portrait mode by following smoothly the users camera movement

Camera 2 is also still on the market and you can find it under the following link

<https://play.google.com/store/apps/details?id=com.dama.camera2&hl=en>
